Summary

Software engineer with 4+ years of experience building commercial web applications, B2B products, and internal systems. Frontend focused with TypeScript, React, and Vue, with full-stack experience using Node.js, Python, FastAPI, Flask, and PostgreSQL.

Experience

Software Engineer

Freelance

12/2025 - Present

- Developed and launched a production web application independently.
- Designed and implemented the frontend architecture and core application features. Integrated backend APIs and prepared the application for deployment.
- Wrote documentation and maintained code quality throughout development.

Frontend Developer

LLC Duotek

02/2022 - 11/2025

- Built and maintained high-traffic web interfaces (payments, auth, real-time chat, streaming, i18n) using Vue.js 2/3 and Nuxt.js 2/3.
- Worked in cross-functional teams with backend developers, QA engineers, and product managers to design and implement features end-to-end.
- Participated in code reviews, sprint planning, and production releases.
- Migrated applications from Vue 2 to Vue 3 and from Nuxt 2 to Nuxt 3 and contributed to development standards and technical documentation.

Frontend Developer

Société Générale

09/2021 - 02/2022

- Migrated internal tools from jQuery to Vue.js 2.
 - Built an internal platform based on user feedback.
 - Designed accessible interfaces to improve internal workflows.
-

Skills
